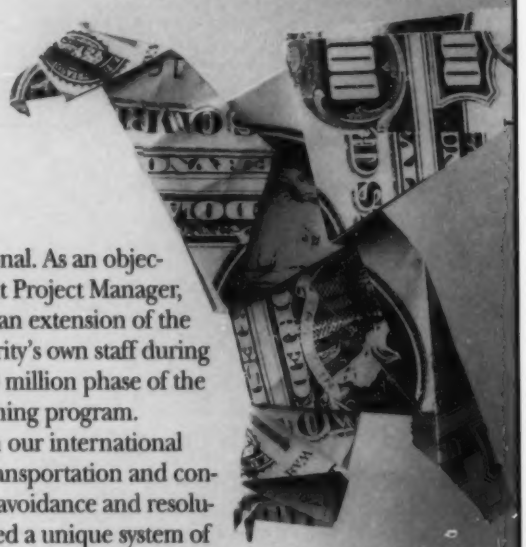
Who's Helping the New Jersey Turnpike Soar to New Heights?



Hill International. As an objective, independent Project Manager, Hill is serving as an extension of the Turnpike Authority's own staff during the current $368 million phase of the Turnpike's widening program.

Drawing upon our international experience in transportation and construction claims avoidance and resolution, we've devised a unique system of controls to keep all parties informed, to monitor the project's progress, and to identify and resolve problems and disputes early on, without litigation.

The result? This project is running on schedule and under budget. For information about our Project/Construction Management services, or to discuss a Troubled Project Turnaround, call our corporate headquarters or one of our regional offices.
